

CALGARY EXHIBITION TO BE HELD FROM JULY 6 TO 12

The Calgary Exhibition and Stampede, to be held July 6th to 11th this year, will be the greatest combined exhibition and old timers' celebration ever held in the west. The Exhibition will include over 9000 entries, including a wonderful exhibit of live stock. The attractions and special features are the best ever arranged for.

The greatest interest is being taken in the 75th birthday celebration of Mr. P. Burns, Alberta's leading stockman, which takes place on the opening day of the Calgary Exhibition and Stampede.

Alberta News

The Gleichen Chamber of Commerce will hold a "Goodwill Picnic" at the Bow River on August 12th.

Robt. Mueller and his sister of Three Hills had a narrow escape last week. The roads were muddy and Mueller stopped on the bridge to put on chains. However, the water in the coulee came down so fast that before the car could be moved the bridge and car were washed down stream.

While digging a well 11 miles west of Sundre last week, Alex Ferguson struck a good flow of gas at a depth of 37 feet. After lighting the gas the blaze could not be extinguished.

The town of Olds did not sign up for Chautauqua this year.

Wayne was flooded out last week and considerable damage was done with two lives lost.

Strathmore golfers have inaugurated a novel competition in the "one-club" match. Only one club is used to go around the entire course.

Loss caused by the cloudburst in Central Alberta last week has been placed at approximately \$500,000.

46 silver foxes escaped from the Wiley Bros. ranch near High River last week; about half of them have been captured.

James Cassidy, a 19-year old youth, believed to be the fourth member of the party involved in the murder of Ernest Midwinter this side of Midnapore last August, was arrested in Truro, N.S., last Sunday. He is being brought back to Calgary to stand trial.

Michael Burns, son of Patrick Burns, the famous pioneer rancher, was seriously injured last Monday night when his car failed to make a turn near the town of Nanton.

Solloway and Mills were acquitted by the jury in Toronto last Thursday night on 15 charges of theft in connection with the operations of the brokerage business of the former firm of Solloway, Mills & Company. The trial lasted seven days.

LOCAL FLOOD WATERS DO CONSIDERABLE DAMAGE

The Carbon district seems to have it all over the other parts of Alberta as far as moisture is concerned and the residents along the banks of the Knee Hill creek seem to have all the hard luck there is in losses caused by high water. On Tuesday, June 16th, there was the flood that swept away the local swing bridge and railway bridge at Carbon, besides a great deal of other damage being done. Just a week before we had a cloudburst in the district but little damage was reported. Then on Wednesday, June 17, came the worst flood in the history of Carbon within the past thirty years, and following the deluge came a 36 hour steady downpour.

About 5 o'clock on Wednesday large black clouds surrounded the town from the East and West and these two rain storms met just South of Carbon and the rain came down in torrents for a full hour and a half and then a heavy rain of smaller proportions set in. The same storm hit the Acme district and all this water combined with what fell in this district came down the Knee Hill creek, taking bridges and everything in its path. The water came so high that the "island" was flooded and cellars were filled with water. The residents in that part of town waited until the water began to rise around their homes and then they sought refuge on the side hill, where they remained till day break before attempting to return home. By that time the water had subsided.

The worst damage done to any one local home was at C. H. Nash's where two feet of water was reported to have risen over the floors in the house. When the alarm was put in for aid, trucks and cars and many citizens, responded and a great deal of the contents were removed from the building before the water and current prevented further entrance to the house. The other residents along this street were forced to leave their houses, although the water did not rise high enough to come over the floors. All out buildings on the Nash premises went down the creek and considerable loss of contents stored in these was reported.

W. Van Loon lost all his outbuildings including their contents of grain, harness, livestock, etc. All that was left after the water had subsided was the house and one building. Others along the creek bank that night reported a similar loss, while many who have sustained losses have not reported them.

Many bridges went out between Carbon and Drumheller on the Knee Hill creek and it is estimated that in all 27 of these structures are out between these two places. The big traffic bridge crossing from town to the C.P.R. station, which withstood the water the night before, was washed down the creek and finally was stranded on the island. When this bridge went down it took the telephone and electric light poles (crossing to the island) with it, and when this happened all lights in

town were cut off and Carbon was without lights or power till noon the next day. At the C.P.R. railway crossing from the 4-mile coulee a great deal of damage was done. The night before this bridge washed out and the railway construction gang and pile driver was immediately on the job and a number of piles had been driven in. With the storm on Wednesday all this work was in vain and the new piles were washed down the creek. However, since that time great progress has been made and the trains are again crossing at this point.

During Wednesday night the Chautauqua tent went down and was torn in many places. Owing to this fact and also to the wet weather the last three Chautauqua performances were staged in the Farmers Exchange hall.

All roads in the district were practically impassable for a couple of days after the storm. Although the new steel bridge at W. Van Loon's was not washed out, the approaches to it were badly damaged from the running water and it was condemned for traffic until fixed. The bus from Calgary to Drumheller and Carbon was stopped for a couple of days, but was again in operation on Saturday, although the trip was rough on account of all bridges and culverts being washed out.

The Carbon Tennis courts are ruined and a number of inches of sediment has been left all over the ground. The old bathing house was carried through the fence surrounding the courts and some damage was done there.

Although the flood waters did considerable damage in Carbon, we have much to be thankful for; no lives were lost here and very few people were rendered homeless for any length of time. The steady rain following the downpour has done the world of good to growing grain and we hope to have an almost average crop in this district as a result of the generous amount of moisture.

WARNING ISSUED RE CUTWORMS

Already the cutworm has done considerable damage in large areas in Saskatchewan and in Alberta. If the farmers had taken the warning a year ago of guarding against this pest for this year's crop, no doubt considerable saving of wheat would have effected. The damage to the 1932 crop will depend absolutely and solely upon the way fields are handled.

The moth of the cutworm flies across the fields and lays its eggs, starting in the first few days of August, reaching its maximum flight about the 20th, and continuing to fly and lay its eggs until about the middle of September. This moth will avoid all the land that has had even a very slight crust formed upon it by rainfall, but will lay its eggs upon any soil where this crust has been broken, however slightly. To avoid cutworm damage on a field, therefore, it is necessary that on summerfallow fields all the work should stop by the first of August or a few days afterwards. Then a very slight rain will form a crust on these fields, which will render them immune the following year from cutworm damage. It is important that no horses or stock or implements or wagons shall be allowed to cross any summerfallow prepared in this fashion because wherever the crust is broken the moth will lay its eggs. On fields in crop, where harvesting operations are conducted before September 1st, then damage the following year is almost certain to be experienced unless these fields are summerfallowed.

H. L. Seamans, Dominion Entomologist, stationed at Lethbridge Laboratory, without hesitation states that it is far better to allow weeds to grow on the summerfallow after August 1st, in these affected areas, rather than to disturb the crust of the soil and thus invite cutworm damage.

Acme's big sports day will be held this year on July 3rd.

MRS. DAWSON HAS NARROW ESCAPE

Although the recent flood waters were not responsible for any deaths at Carbon, it was due to the efforts of some of our local citizens that such was not the case. On Wednesday night when the water began to rise over the island Rev. L.D. Batchelor took the responsibility upon his shoulders to see that everyone was out of their houses. Although a newcomer and unfamiliar with the island or its residents, Mr. Batchelor visited the places he knew and informed them of the danger. On his rounds he met a man who informed him that an elderly man lived farther down. Mr. Batchelor then saw a light and when he arrived on the scene he found Mrs. Dawson in the water and her husband was holding her head up to keep her from drowning. They immediately took her to one of the two-storey houses for safety, and remained there till the water went down. Had Mr. Batchelor been a few minutes later, both Mr. and Mrs. Dawson would probably have succumbed from exposure. They are both over 75 years of age.

CARD OF THANKS

The members of the Council of the Village of Carbon wish to thank the citizens who voluntarily helped in any way to relieve suffering families and property damage during the time of the recent high water.

NO CHAUTAUQUA FOR YEAR 1932

The 1931 Chautauqua ended at Carbon last Thursday night with the play "Skidding." The past two years the Chautauqua has not been patronized and as a result the 1931 deficit was about \$400. Of this amount there was a bank surplus from previous years of \$218, leaving a loss this year of close to \$200 for the guarantors to make up. This amounted to \$5 per guarantor.

Owing to conditions throughout the country and the attitude taken by many towards Chautauqua in the past two years, the Canadian Chautauqua was unable to get guarantors to bring their program to Carbon next year.

There is little doubt that there will be no Chautauqua in Carbon again until a more fair contract can be made between the promoters and citizens.

HARVESTER RIDES FREE: CONSCIENCE RIDES HIM

Into the London office of the Canadian National Railways came a young Englishman the other day who had been a harvester in Canada. Last fall he rode on a Canadian National Railway train on the prairie and he came to express his appreciation. "How much does it cost from Calgary to Saskatoon, and from Saskatoon to Kindersley?" he asked. "I didn't have the money then, but now I have, and my conscience tells me I must make it square." They figured it out to be three pound ten, and the erstwhile harvester paid his debt in three instalments.

Don't Be Critical

There are two kinds of criticism,—one that nowadays we refer to as "constructive" criticism, and the other that in common parlance we term "destructive" criticism. To be exact, the word criticism should not be employed in connection with the latter.

Criticism is a fine old English word which in its pure significance, so a recent writer has pointed out, implies carefully weighing and balancing; fine, exact, authoritative judgment. Needless to say the heading over this article does not refer to such true form of criticism.

In modern usage the word has been debased, and divorced from its true meaning. Today its implication is not to take the measure of something or some one, but rather to point out, dwell upon, magnify the defects of something or some one. The tendency is not to balance, but to distort, to become cynical, to carp at, to indulge in wholesale fault-finding, to seek to destroy what is rather than to work for betterment. It is in this sense we say: Don't be critical.

In so many respects people are the product of their environment that it takes an unusually strong person to stand erect and breast the onrushing tide of current opinion. When times are prosperous, business booming, stocks and bonds mounting ever higher, when nine out of every ten people are optimists, many of them merely because it is the fashion to be so, they become extremely critical of the person who advises caution. Such a person is characterized as a non-progressive, labelled a back number, when as a matter of fact he may be more truly progressive, more far-seeing, more of a real builder than those who deride him.

Reversing the picture, we find in these present days that the vast majority of people are pessimistic and because conditions are admittedly not good they are critical of and would destroy those very institutions under which they developed and enjoyed their former prosperity, and they now denounce those who again urge caution and a carefully weighing of all the facts before taking a leap in the dark; they are impatient with and critical of all those who advise sane, clear thinking and careful, well-thought out action rather than wholesale destruction of that which has gone before.

Environment, too, has a great deal to do with our pet prejudices, and prejudice is the fruitful source of a very large percentage of harmful criticism. It is only the accident or circumstances of birth that makes a person one of the white race rather than a negro or an oriental. Many a staunch Protestant who criticises, denounces and raves over everything appertaining to Roman Catholicism might just as easily be born a devout Roman Catholic and thus be the object of the criticism and scorn he now pours out on others, or he who now insists he belongs to the only true church might have been born one of those he now regards as a heretic, or even a heathen savage.

The circumstance of birth has placed some men on thrones, or in positions of luxury and wealth, while others have been born as slaves and into dire poverty. Each man may be doing his duty as he sees it, honestly and fearlessly, striving for individual, community and world betterment. But neither the one nor the other has the right to look condescendingly on his fellow man, nor deride him. They may not agree upon what constitutes world betterment, and each has full liberty of action to strive for the attainment of that in which he believes or desires. Constructive teaching and action looking to the realization of desired ends is praiseworthy and should be indulged in, but narrow, bitter, illogical criticism, purely destructive in its nature and intent, is not only deplorable and to be condemned, but, in the final analysis, it is futile in results.

What this old world needs, probably more than anything else, in its present stage of development, is a more universal acceptance of the meaning of the good old English word, "criticism." People need to readjust their thinking processes, their words written and spoken, their actions; they need to subdue their passions, curb their prejudices, look beyond their environment; in a word, in business, in government, in community life, in all our intimate social intercourse, there is imperative need for careful weighing and balancing, for fine, exact, authoritative judgment. Prejudice and selfishness require to give way to reasonableness, a willingness to recognize and study the other fellow's point of view.

That is, the world needs today, as it has always needed and always will need, the application of the Golden Rule, the spirit of co-operation, in the every day activities of life, be those activities great or small, vitally significant or relatively unimportant.

Business As Usual

An insurance agent had outstayed his welcome in a merchant's office, and took no notice of the many broad hints that he was making himself a nuisance. At last his victim got him by the scuff of the neck and pitched him downstairs. The man got up, retrieved his hat, and turning to the man at the top of the stairs, he said calmly, "Joking apart, what about that insurance policy?"

Dr. Johnson wrote his dictionary in nine years. The French Academy of 40 members spent 40 years on a rival work.

Social Service Investigation

Professor Edouard Montpetit, chairman of the Quebec Social Insurance Commission, and four members of the commission, sailed recently for England and the continent to complete a general survey of social relief methods. Their investigations will take several months, after which they will make a report upon which will be based the social insurance legislation to be enacted in Quebec.

Fish that died millions of years ago are an aid to the modern geologist searching for water far underground.

The Mother of Seven Children Used It for Diarrhoea

Mrs. Ray Drinkwater, R.R. No. 2, Hagersville, Ont., writes:—"I am the mother of seven children, and last summer one of them, 17 months old, was taken very sick with diarrhoea, and I thought she was going to die. My husband went 7 miles to see what my sister had given her baby, and he came home with a bottle of Dr. Fowler's Extract of Wild Strawberry. I gave the child a few doses and she was soon well again. My other children also had diarrhoea at that time and I gave them 'Dr. Fowler's' with the same results."

Manitoba Vision Huge Power Project

Development Of Dauphin River Power
Would Be Great Benefit To
Province

A likely means of balancing agricultural and industrial development in Manitoba was pictured by Premier Bracken in his address to the Young men's Section of the Winnipeg Board of Trade, recently, on "The Feasibility of the Dauphin River as a power development scheme." Properly developed, the Dauphin River project would be the largest individual development in Manitoba, he said, and would increase the power resources of the province by probably 400,000 h.p. It would round out the whole power situation in Manitoba; assure all parts of the province of a supply of low-priced hydro power for many years; facilitate the development of industry in urban centres and of municipal services in the rural centres with the possibility of adding 50 per cent. to the industrial future of the southern part of Manitoba.

Amish Mennonites Ban Radios

Classify Them With Musical Instruments Sent By Devil

Bringing the extremely strict tenets of their creed up to date, the Amish Mennonite conference of Ontario, which concluded a three-day session at the Mapleview church, Wellesley Village, near Kitchener, Ontario, has decreed that radios must be banned from all Amish Mennonite homes, the sect classifying radios with musical instruments which have been barred since the sect was founded.

Musical instruments, along with many other modern luxuries and even some so-called conveniences, are banned from the homes of Amish Mennonites as being instruments of the devil designed to lead the faithful away from devout worship of the Almighty. Penalty for violation of the ban on radios in the home is excommunication from the church.

Would Cancel Certificates

One Hundred and Seventy Naturalization Certificates May Be Cancelled

Cancellation of 170 naturalization certificates which were obtained fraudulently has been recommended by Judge J. G. Wallace of Woodstock, Ont., who investigated many cases in Montreal and Toronto last April. The cabinet is considering the report at the present time but it is expected the recommendations will be followed. Consideration also is being given to the institution of criminal charges against those involved and to deporting them from the country.

Stop the Cough.—Coughing is caused by irritation in the respiratory passages and is the effort to dislodge obstructions that come from inflammation of the mucous membrane. Treatment with Dr. Thomas' Eclectic Oil will allay the inflammation and in consequence the cough will usually stop. Try it and you will be satisfied.

Eats Poison Weed

Saskatchewan Boy Dies From Eating Wild Parsnips

After eating some wild parsnips, which he found near his father's farm, Gregory Kotek, son of a well-known farmer of the Foam Lake district, died before medical assistance could be obtained. No inquest was considered necessary, the youngster having told his parents what he had eaten.

Wild parsnips are deadly poison, even when cooked. Recently the University of Saskatchewan agricultural authorities issued a warning against eating this weed.

Douglas' Egyptian Liniment is a quick, certain remedy for Hoof Rot or Thrush. Four or five applications are usually enough.

War Veteran Leaves Hospital

After spending 13 years in hospital receiving treatment for an arm ailment received during the Great War, Corporal Roy Brown has left Christie Street Military Hospital, Toronto, cured. Corporal Brown, who entered a hospital at Boston, Mass., shortly after the war, came to Toronto and entered Christie Street Hospital in 1927.

The farmer is not unemployed. Just unpaid, that's all.

When a Laxative Gripes

--- BEWARE!

ENO'S
"FRUIT SALT"

Severe abdominal pains, griping, after taking a laxative is an indication of unnatural strain that may cause serious injury.

No laxative that causes such discomfort is safe, or necessary. ENO is pleasant, gentle, safe and sure.

A daily dash of ENO'S "Fruit Salt" in a glass of water, night or morning, tones up and sweetens the entire system. Acid stomach, fatigue, biliousness, quickly disappear.

Cloud Of Insects Visits Alaskan Island

Report From Wrangell States All
Vegetation Was Destroyed

A despatch from Wrangell, Alaska, states that a cloud of insects which filled the skies to such density that they could be grasped in the air by the handful, visited and destroyed vegetation on Vank Island.

J. G. Smith, a fox farmer, said the insects were borne to the island by a southwest wind. He described them as about half an inch in length, with red legs and with a head and mouth resembling an ant.

They alight on the trees and shrubs, eating a single hole in each leaf, he added. Strawberry blossoms turned black later.

Persian Balm is unrivalled for promoting feminine loveliness. Tones and rejuvenates the skin. Makes it exquisitely soft-textured. Makes hands flawlessly white. Especially recommended to soothe and relieve roughness or chafing caused by weather conditions. Indispensable to every dainty woman. Cool and refreshing. Delicately fragrant. Magical in results. Never leaves a vestige of stickiness. **Persian Balm** is the one toilet requisite for the woman who cares for charm and elegance.

Have Better Chance

The family which possesses a piece of land and will work it so that it will produce the things they must have to sustain life, is vastly better off than the general run of population of the towns and cities, even though they may not be out of employment now. It has been a long, hard pull lately for the farmers but they are not without something with which to pull, as is the unhappy condition of the unemployed in the cities.

Invents New Type Of Engine

Windsor Resident May Sell Rights
To English Company

After 20 years of effort William MacKirdy of Windsor and Detroit is ready to offer for market an engine which is declared to be revolutionary and in many ways not comparable with anything on the market.

The inventor describes his product as a combination of the Diesel principle of internal combustion, that is, burning fuel oil under high pressure, and the principle of steam wherein the surplus heat of the Diesel—at present lost in water jackets—is utilized in generating a highly superheated steam. It has all the virtues of the Diesel practice and the steam principle, with none of the disadvantages, it is asserted.

When Sir Harry Brittain, director of D. Napier and Sons, of England, visited Detroit recently he crossed the river for the express purpose of examining the engine. On his request, complete plans of an engine for a mammoth flying boat have been forwarded to England. The English company has suggested taking over the world rights of manufacture if the engine meets with the inventor's claims. Sir Harry expressed himself as very favorably impressed.

And There Are Plenty

Someone wants to know whether a fellow who drops money on the stock market is a bull or a bear. Sometimes he is just a simple ass, says the Regina (Evening) Leader-Post.

Aim Of Marketing Committee To See That Producers Obtain More Of Value Consumers Pay

Directing its attention to the marketing of farm products, the House of Commons committee on agriculture heard Hon. Robert Weir, Minister of Agriculture, outline his suggestions as to how the committee should proceed. He urged that the attention of the committee should be first devoted to the marketing of dairy, bacon and poultry products, as these could be disposed of more expeditiously than the other elements involved in the problem. Later the committee could take up questions concerned with wheat and livestock.

The first aim of the committee is to see if we can make it possible for the producers to get more of the value which the consumer pays at the present time," he said.

"I want the committee to feel free to attack these problems of marketing without prejudice," said the minister, "and I think it should hear representatives of the private, co-operative and produce interests, that it should meet from time to time and discuss the best means of marketing so as to avoid as far as possible the practise of private interests buying commodities at bottom prices and holding them for higher values without the producers getting the best value out of them."

What was needed was more education for the producer as to what should be produced and at what time it should be marketed, he said.

"We feel we should get the lowest freight rates from the steamship companies, but we cannot expect these companies to put their vessels at our disposal only for certain months. If we want cattle carried at the cheapest rate our supplies must be so distributed as to keep up a regular flow of cattle for export," Mr. Weir said.

"Agricultural colleges should pay more attention to marketing," the minister proceeded. "Education is the work of the provinces, yet we could add to that by bringing one or two men at federal expense and sending them through our agricultural colleges to give lectures on this subject."

The spread between what the farmer receives for his eggs and what the consumer pays occupied the attention of the House of Commons committee on agriculture.

W. A. Brown, chief of the poultry division of the Department of Agriculture, addressed the committee on the operations of his branch. He analyzed costs to show that the farmer ordinarily received about 50 per cent. of the consumers' price, the remainder going on freight, grading, wholesalers' and retailers' profits.

Another Scientific Discovery

Process To Prevent Fermentation Of Frozen Fruits and Vegetables

Discovery of a process to prevent fermentation of fruits and vegetables frozen in storage, has been announced by the British department of scientific and industrial research. It has been found that if vegetables are boiled or partially cooked before they are frozen their color and flavor will be preserved unimpaired. Boiling, it has been found, destroys the enzymes completely and permanently, leaving the vegetables in such a condition that they may be safely frozen and stored in suitable containers, either under liquid covering or exposed to the air.

"Here is tinned chicken."
"And haven't they put a hole in the box for the poor creature to breathe through?"—Nagels Lustige Welt, Berlin.

W. N. U. 1895

On the Road To Mandalay

Pacific Coast Salmon Finds Ready Market In Distant Climes

"On the road to Mandalay" and east or west of Suez, also in London, Paris, Berlin and other famous centres, canned and frozen salmon from British Columbia was successfully marketed in 1930.

All varieties of Pacific salmon were included in the export shipments, but it was found that some markets, such as Paris and Berlin, apparently preferred in the frozen salmon cohoes and the steelhead variety. Most of the shipments were made from Victoria and were sent to the distant markets over transportation systems equipped with cold storage facilities.

For the most part the consignments were in the nature of test shipments, but the company carrying on the business reported gratifying success. It is expected that this year the field of shipment will be extended.

Artificial Fertilizers

300 Tons Of Fertilizer From Trail Plant Being Used In Sugar Beet Area Of Southern Alberta

Three hundred tons of artificial fertilizers have been used in the sugar beet area of southern Alberta this season, and correspondingly large amounts are being utilized in growing other crops in other sections of the Prairie Provinces, according to Dr. R. E. Neidig, director of agriculture for the Consolidated Mining and Smelting Company at Trail. Two cars of fertilizer, which is being manufactured as a by product of smelting operations at the Trail plant were shipped to the Orient early in the year, said Dr. Neidig, and tests of its efficiency in increasing crop production are being carried on in every province from British Columbia to Ontario.

Saskatchewan Poultry Pool

Amount Of Business Transacted Shows A Large Increase This Year

Brisk business is being done by the Saskatchewan Poultry Pool this year, showing a marked increase over that of last year. Reports presented at the recent directors' meeting showed that from March 1st to May 2nd, the pool handled a total of 117 carloads of eggs and some of the larger branches, at the peak, towards the end of the period, were handling four carloads weekly. "The increase in volume is general all over the province," says the report, "indicating that Saskatchewan as a whole is producing more of the product than ever before."

CAPELET COLLAR ALL IMPORTANT VOGUE FOR WEE MAIDENS

Wee fashionables have borrowed another interesting idea from the elder mode.

It's the bertha cape collar this time that all smart folk are wearing.

It's such a pretty and quaint style for little girls of 2, 4, 6, and 8 years who like to wear sleeveless frocks.

The skirt shows soft gathered fullness that permits plenty of freedom for activities for playtime.

Design No. 573 is made with 1 1/2 yards of 39-inch material in the 4-year size with 3 1/2 yards of plaiting.

The medium used for the original Paris model is as illustrated. It is a French blue dimity with white dots. The ruffling is crisp white organdie. The shoulder bow is blue grosgrain ribbon caught with tiny pink rosebuds on shoulder.

Pique, printed lawn, tub silk and gingham checks appropriate.

Pattern price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Vicious Operations Of Reparations And War Debts Delaying Economic Recovery

Establish Packing Plant

Saskatchewan Cattle For British Co-Operative Societies

Saskatchewan farmers are turning their attention more to the production of cattle for the British market. The Saskatoon Co-Operative Livestock Producers, Ltd., is reported to have an agreement with British Co-Operative Societies for the shipment of live cattle and it is understood that negotiations are under way to supply these societies also with chilled and frozen products. The Saskatchewan company has purchased a building in Saskatoon and will immediately establish a packing plant. Modern machinery will be installed and will include a meat-processing plant and a chilling and refrigerating system. It is expected that the plant will be in operation within two months.

This is the first co-operative plant of the kind established by a farmers' organization in the Province of Saskatchewan. In addition to the export market which it is hoped to build up the plant will compete for local business. The location has been selected with a view to utilizing the new Hudson Bay route to Europe via the port of Churchill. First shipments are expected to go forward about the first of September.

Trap Nest Competition

Results Of Alberta 100-Day Winter Trap Nest Tests Are Announced

The records of the Alberta 100-day winter trap nest test for the year 1930-31 have all been checked and the official certificates issued. The three highest pens are those of Mrs. Ed. Kehoe, Camrose; F. J. Deisman, Big Valley, and George Zinger, Stannmore. The flock of Mrs. Kehoe, who is a director of the Alberta poultry pool, comes first with 80 per cent. of her Rhode Island Reds qualifying for certificates. Out of 65 birds entered, 28 laid 70 or more eggs during the 100 days, and 24 laid over 50. Only seven birds failed owing to low egg weights.

Valuable Chemicals From Alkali Lakes

Production Of Sodium Sulphate Last Year Amounted To 31,571 Tons

The alkali lakes of the Prairie Provinces have begun to add materially to the mineral production of Western Canada with an increase in 1930 of well over 500 per cent. in the production of sodium sulphate. From the deposits of this material, in plentiful supply on the Prairies, only 5,018 tons were taken in 1929, but last year, according to preliminary figures of the Dominion Government, production rose to 31,571 tons.

"The economic recovery of the world depends upon it," says a manifesto of the German government, and the "it" means a new deal about reparations and war debts. This, unless it can be shown to be mere politics and eyewash, is a grave and important statement, and no responsible statesman, we believe, will attempt to show that it is mere politics. It borrows significance from the decree to which it imposes \$100,000,000 of new taxation upon the German people. And it fills in between the lines of the official communique given out about that week-end party at Chequers Court, when the prime minister and the foreign secretary of Great Britain met their "opposite numbers" of Germany, Chancellor Bruening and Foreign Minister Curtius.

This new taxation is described as "one last effort." "Last efforts" in this world of human limitations turn out very often not to be anything like last efforts, and certainly there is no aid or comfort in the language of despair about this business. Also, it is probably extravagant to suggest that the present low condition of business and industry in the world is entirely referable to the vicious operations of reparations and war debts. But it is soberly true that the principal point of economic dislocation is international trade; that the symbols of the depression are international commodities, wheat, metals, cotton, sugar, rubber, coffee, oil; that the dead weight of reparations and war debts is a dragging burden upon the exchange and movements of those commodities. And it is true that the condition of Germany really does approach at last the place where the reparations scheme is likely to break down altogether.

Nothing can be done about this business—and there can be no realism in any discussion of it which refuses to meet the fact—without the consent and co-operation of the United States. The United States is the ultimate creditor of reparations and war debts. Germany is the ultimate debtor. The only way in which Germany can pay, if at all, is in the same currency in which all the war debts were originally contracted—in commodities. The United States insists that the debts must be paid. At the same time, the United States insists upon the maintenance of policies, domestic and foreign, which make it increasingly impossible to pay the debts at all. The high wall of tariffs which keeps out the commodities of the debtor nations is bound to keep out the remittances of payments on the debts.

That is the inevitable process, and that is the logic of the present situation of world depression, at least as much of it—and it is a tremendous part—which depends upon international trade. Germany has been paying reparations mainly by new borrowings—the calamitous paradox which means that Germany has been paying reparations by not paying them. It is an impossible state of affairs—it is a state of affairs, that is to say, that is bound to crash. How much longer can it continue?—Vancouver Province.

The newest skyscrapers are dressed up in jackets of stainless steel and aluminum.

A big elephant can lift a tree weighing a ton.

"Ah, that reminds me that my wife asked me to buy her a clothesline."—Buen Humor, Madrid.

RECOVERING AIR ADVENTURE INSTRUMENTS

Dr. Charles Kipfer, Swiss scientist (shown kneeling, right), is removing the precious instruments and clothing from the interior of the huge aluminum ball in which he and his associate, Professor Auguste Piccard, ascended to the record-breaking height of 10 miles to make observations in the "stratosphere." Professor Piccard is inside the queer ball handing out articles to his assistant. The intrepid aerial explorers landed safely on a glacier near Ober Gurgl, Austria, in the Tyrolean Alps, where this picture was taken. The group surrounding the balloon is comprised of guides who went to the assistance of the explorers, thinking they were dead.

Shows Faith In Canada

Sum Invested In Her Industries Is Over Six Billion

The impressive fact that the sum invested in Canadian industries is no less than \$6,350,000,000 is mentioned by Hon. G. Howard Ferguson, Canadian High Commissioner to Great Britain, in a foreword to the "Canadian Resources Supplement" published by the Financial Times of London, England. Still more impressive, he says, is the fact that sums contributed from outside sources are held in proportion of 61 per cent. by the United States and 35 per cent. by Great Britain.

Detailing a few facts to indicate the "extraordinary resilience of Canadian industrial activities during the period of acute world wide depression," Mr. Ferguson records as another impressive fact that building contracts during the first ten months of 1930 totalled \$400,000,000. He says, "this hardly looks like fatalism or resignation to depression. Building contracts on this scale are as reliable an indication of Canada's prosperity as any that can be found."

THE POPULAR JUMPER SHELL LOVE BECAUSE OF ITS YOUTHFULNESS

Here's a cute one, and as simple as A, B, C, to make it.

It's a lightweight woollen in rather vivid green colouring. The binding and leather belt choose a deep green shade.

The tailored guimpe is a yellow beige washable flat crepe silk.

It's a dress that offers such a decided change to wardrobe for immediate wear. It will be found especially lovely for sports later.

Style No. 187 may be had in sizes 12, 14, 16, 18, 20 years, 36 and 38 inches bust. Size 16 requires 3 yards of 39-inch material for dress and hat with 2 yards of 35-inch material for blouse and 2 1/4 yards of binding.

Wool jersey in guardsman blue with white jersey guimpe is jaunty.

A plaided crepe silk with plain blending crepe is extremely modish. Crepe woollens, linen, wool challis prints and tweed-like cottons are ideally suited to this model.

Pattern price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

"Sooth-Salva" ends itch at once. All druggists.

Amend Copyright Act

Bill Drafted To Conform With Rome Convention Of 1928

Parliament has given third reading to a bill amending the Copyright Act, approving the final three clauses in a short time. Nine clauses were passed in committee. The bill went on to the senate.

Piloting the bill through the House, Hon. C. H. Cahan, secretary of state, said he hoped a thorough revision of the copyright law might be undertaken but indicated it would require "a great deal of time."

The bill is drafted in order to bring the present copyright law into conformity with the Rome convention of 1928, and Canada is required to deposit this country's adherence to that convention by July 1. In general its purpose was to extend the provisions of the copyright so as to embrace radio broadcasting and cinematograph reproductions, those developments not being in existence when the original Berne convention was drafted.

As the bill operates, individuals who have not registered their works will not possess the right of suit in court in respect of such unregistered works. In the case of assignment having been made, only such assignments as have been registered will vest in the assignee whatever court rights are established. Unregistered assignments will have no status before the courts.

Organizations to whom copyrighted works have been assigned and who charge fees for the performance of such works will be subjected to government regulation if, after an enquiry by a commissioner under the Enquiries Act, it is shown that excessive fees are being charged or that the organizations are operating detrimentally to the public interest.

A Real Patriot

It was a beautiful Sunday morning, Simpson, having finished reading a paper printed with an invention made in Germany, set out with his wife for the meeting house of a faith found in Palestine. Contemplating the beauty of the land, which had been discovered by an Italian in the employ of a Spanish queen and musing on the liberty it possessed thanks to the help of a French navy, his bosom swelled with pride. "Thank God," said Simpson fervently in a language imported from the British Isles, "I am a one-hundred-per-cent. American."

JESUS THE WORLD SAVIOUR: SUFFERING AND SOVEREIGNTY

Golden Text: "God so loved the world, that He gave His only begotten Son, that whosoever believeth on Him should not perish, but have eternal life."—John 3.16.

A Review By Means Of Allusions

By questions recall the lesson to which each allusion refers.

Lord, grant us grace to love Thee so,
That glad of heart and glad of face,
At last we may sit high or low,
Each in his place.

—Christina Rossetti.

It requires a well-kept life to do the will of God, and even a better-kept life to will to do His will. —Henry Drummond.

"One went to pray? or, rather say, One went to boast, and the other to pray."

Let any forlorn creature happen along that looked as if it hadn't a friend in the world, and Aunt Malvina was for taking it in, putting the best robe upon it, and giving it the best bit in the cupboard.—G. L. Treple.

With canine loyalty I wagged an unoffended tail, and accepted my one-third of the crumbs that had fallen from the table of the proud.—C. E. Montague.

But they never really saw Him,
They never understood Him,
Their hearts were never His.
It was their lips and just their lips,
sang

"Hallelujah!"—Frank Kingdon.

"Again and again I have been tempted to give up the struggle, but always the figure of that strange Man hanging on the cross sends me back to my task again.—George Tyrrell.

"Stone upon stone rear we churches today;

Finer and fairer than ever are they.
'How we do honor Him!' proudly we say—
But Christ said, 'Go ye!'"

Each meal should be a sacramental feast,—

A Eucharist each breaking of the bread,

Wherein we meet again our Great High Priest,

And pledge new truth to our exalted Head.

—John Oxenham.

Thy nature is not less divine;
Thou liest in Abraham's bosom all the year.—Wadsworth.

He had quite a long run in the role of the Importunate Woman and, like her, he got there at last.

—C. E. Montague.

Bethink thee of thy Lord,
Who healed again the smitten ear,
And sheathed His follower's sword.

—Whittier.

Gandhi Prefers Humble Quarters In London

Chooses To Live In Garret Among the Poorer Class

Mahatma Gandhi, who will leave India about the middle of August to attend meetings of the federal structures committee in London, England, has decided that when he gets there he will live among the most humble mendicants of Kingsley Hall, London's east-end home for the poor.

While India's other delegates to the round table conference install themselves in the city's hotels or the castles of their friends, he will be in a garret among surroundings not unlike those familiar to the people who revere him so highly at home.

If the weather permits he will not even alter his habitual costume of white shawl and thin cotton loin cloth, but if it is cold he will wear a homespun coat and the conventional European trousers. When he appears before the King and Queen it will be in the Indian costume with shaven head and bare feet.

Despite the problems of state with which he is concerned, one of his major considerations at the moment is how he will obtain fresh goat's milk in London, England, and on the way there. Contrary to reports he cannot take his own flock of goats which are milked twice daily in his presence, and it is likely he will instruct Miss Slade, his British attendant and disciple, to take along a supply of condensed milk.

Life is just a one-way street.

SWEEPSTAKES BILL IS OPPOSED IN THE SENATE

Ottawa, Ont.—A vigorous attack on the Hospitals Sweepstakes Bill was launched by Sir George Foster. The bill would make it legal for hospitals to raise revenue by conducting sweepstakes with the sanction of the attorney-general of any province. He concluded by moving the bill be given a six-months' hold.

The state owed a duty to look after its aged and its poor and its sick, Sir George said. It should not delegate that duty to a gambler's chance.

If this bill was made law, Sir George declared, he could see no limits to which propaganda to sell lottery tickets might not extend. With such a bill made law, he thought it was possible such degenerating propaganda might result as would "eat out the honest heart of the people of Canada."

Referring to the Irish Hospital Sweepstakes, he called it "the great Irish industry." Everything was left to chance, and neither experience, skill, reason nor ability counted.

Senator Gillies said the majority of the people were opposed to the principle of the bill. Canada had had a disastrous period of stock gambling, and did not want a period of lottery gambling.

Senator Lacasse thought Sir George Foster's argument would have been stronger if applied to all forms of gambling. Money lost in gambling would not have gone to charity. He favored the bill because it transferred further rights to the provinces.

Senator Forke was opposed to the bill and seconded Sir George Foster's motion for a six months' hold. He sympathized with the object of the bill but not the method.

Senator Dandurand felt the object of the bill was a worthy one but did not like the principle.

Must Show Courage

Col. Woods, Of Calgary, Sees Dawn Of Better Times For This Dominion

Victoria, B.C.—Evidence of the dawn of a greater prosperity than Canada had ever known were seen by J. H. Woods, of Calgary, president of the Canadian Chamber of Commerce. In many fields, chiefly in the healthy acceptance of the Canadian Conversion loan, he read foreword of the ascendancy of the Dominion.

He urged upon his hearers the necessity of showing courage, energy and integrity in order to develop the potentialities of the Dominion.

After outlining the aims of the Canadian chamber, Colonel Woods spoke of the success of its recent delegation to Argentina and Brazil, emphasizing the fact that those countries were friendly to the Dominion and desired to enter into greater trade relations with it. With markets lying fallow, he again impressed his hearers with the possibilities of Canada in the future.

Sea Cadets Give Display

Winnipeg, Man.—Delegates to the annual convention of the Navy League of Canada attended in a body the annual assault-at-arms of the Winnipeg Sea Cadets. More than 100 cadets performed for the visitors. Judges included Admiral W. O. Story, Lieut.-Commander H. G. Nares, Brig. F. V. Anderson and Col. G. H. Gillespie.

Vancouver, B.C.—Urging immediate construction of a railway connection between the Pacific Coast and the Peace River primarily as an emergency measure of unemployment relief and equally as contributing permanent relief through colonization, the executive of the On-to-the-Peace Association waited on Senator Gideon Robertson, Federal Minister of Labor.

Windsor, Ont.—Hon. G. Howard Ferguson, Canada's High Commissioner to Great Britain, will return to Canada about August 1, it was stated at Kingsville, by Hon. Thomas L. Kennedy, Ontario Minister of Agriculture. He remains in the Dominion for about six weeks, said Col. Kennedy.

Navigation Of Churchill

Port Now Reported To Be Free Of Ice And Work On Dock Nearly Completed

The Pas, Man.—Churchill's harbor is cleared of the final remains of the ice flow and it is possible now for craft to navigate along the river for many miles. Dredging will get underway within a day or two. White whales and seals may be seen from the harbor daily.

The break-up started nearly a week ago and was brought back and forth with the tide during the past few days. Ocean craft could now steam into the bay port without danger, according to word received here from the port Wednesday. The dock is completed enough to handle ocean-going boats now.

The big dredging program at Churchill will be completed this season. About 2,500,000 yards of material will be moved under the directions of engineers there.

Work on the 2,500,000 bushel elevator is now three weeks ahead of schedule and there is little doubt that it will be completed in time to handle the initial shipments of grain through Churchill this fall.

Funds For Idle Relief

Winnipeg Member Suggests Government Float Loan For This Purpose

Ottawa, Ont.—Floating of a national loan to provide funds to carry on unemployment relief works was suggested in the House of Commons by W. W. Kennedy (Cons., Winnipeg South Centre). He urged the continuance of the government's program of public works and as sufficient money could not be obtained from revenue suggested a loan to which the Canadian people themselves should be invited to subscribe.

A fair test of the feasibility of the Hudson Bay route unencumbered by excessive marine insurance rates, the provision of pensions for the blind and overhauling of the machinery of investigating applications for war pensions were other suggestions thrown out by the Winnipeg member in his speech in the budget debate.

Pay Tribute To Heroes

School Children Decorate Graves Of Canadian Soldiers At Shorncliffe

Folkestone, England.—For the fifteenth successive year, thousands of school children gathered to deck with flowers the graves of Canadian soldiers in Shorncliffe cemetery.

"While we cannot hear too much nor in too forcible terms of the sin of war, on the other hand we cannot extol too highly the heroism, self-sacrifice and devotion, the instinctive motives that urge the manhood of the day to face inevitable mutilation and death," said Mayor J. W. Stainer, of Folkestone, addressing the school children.

May Help Wheat Sales

Ottawa, Ont.—The advance in the percentage of foreign wheat to be permitted in flour in France should increase Canada's wheat sales to that country, said Hon. H. H. Stevens, Minister of Trade and Commerce. Earlier this year only 10 per cent. of foreign wheat was permitted in French flour. This was subsequently increased to 25 per cent., and now to 30 per cent.

DEPUTY MINISTER RETIRES

F. C. T. O'Hara, Deputy Minister of Trade and Commerce for Canada, who has retired at his own request on account of ill-health.

Better Times Ahead

Professor Swanson Looks For Greater Period Of Prosperity Than Ever

Saskatoon, Sask.—Commenting on the "better times are coming" interview with Roger W. Babson in New York, Professor W. W. Swanson, head of the department of economics at the University of Saskatchewan, said that "Babson was correct in his view that a greater period of prosperity than the world has ever known would follow the emergence from the present depression."

"There can be no real recovery of business until primary products, especially farm products, have reached higher values. Business as a whole will depend for its recovery fundamentally on international financial and commercial co-operation," he said.

"As far as the west is concerned only a return of higher price levels for wheat will start the process of business recovery. Wheat will tend to rise in price as the artificial surpluses are disposed of but the decline in the yield of wheat in the west this year will seriously retard recovery."

Waiting Reply To Note On Waterways

Washington Looking For Developments When Canadian Minister Arrives

Washington.—The Ottawa government is expected shortly to reply to the United States note of last September enquiring the attitude of the administration of Premier R. B. Bennett to the proposed St. Lawrence waterway enterprise. The impending arrival in Washington of Major W. D. Herridge, Canadian minister to Washington and brother-in-law of the premier, is being looked forward to by United States officials as presaging important developments.

Want Fuel Inquiry

Winnipeg, Man.—Full inquiry into all circumstances in connection with the boarding by United States coastguards of the "Josephine K." on January 24, which resulted in the death of a Canadian sailor, will be urged on the Dominion government by the Navy League of Canada. This was decided in a resolution adopted at the annual convention here.

Farm Credit Proposal Outlined By Beatty

Half Of Five Million Capital Of Company Now Subscribed

Ottawa, Ont.—Within a few weeks the organization of the Dominion Agricultural Credit Company will be completed, H. W. Beatty, president of the Canadian Pacific Railway Company, told the House of Commons committee on banking and commerce.

Designed to assist farmers in Western Canada in diversifying their operations, the company will go slowly and feel its way for the first few years. The idea, Mr. Beatty said, was derived from agricultural credit corporations of the United States which had functioned with success on similar lines in Minnesota and other states.

Up to the present about half of the \$5,000,000 capital of the company has been subscribed and when the bill now before parliament to authorize banks, loan, trust and insurance companies to invest in the securities is passed, no time would be lost in getting the scheme under way.

Cattle Ships Needed

Not Enough Ships Available For Transport To Britain

London, England.—The question of providing shipping facilities for import of Canadian cattle to Great Britain came up in the House of Commons. A member said that in view of the fact that large numbers of cattle were held in Canada awaiting shipment because there were not enough ships available for transport the president of the Board of Trade should bring the matter to the notice of shipowners who controlled ships lying idle in British ports.

G. M. Gillett, secretary to the overseas trade department, replied he was informed shipowners were not satisfied that proposals in regard to the increased shipment of Canadian cattle were such as to justify them in incurring the considerable extra expense needed to fit ships for this special trade. He understood, however, that discussions were now taking place between representatives of the shipowners and the shippers on the subject.

New Record For Hawks

Aviator Travels 200 Miles Per Hour From London, England, To Rome, Italy

Rome, Italy.—Captain Frank Hawks landed here on a round trip flight from London, England, completing the trip at an average speed of nearly 200 miles per hour.

Captain Hawks made the flight in the record time of four hours and 39 minutes. He found the weather fairly good all the way, but was surprised at his own speed.

Croydon, England.—Capt. Frank Hawks brought his fast monoplane down on the field here, completing a flight from Rome in five hours flat.

Must Surrender Books

Victoria, B.C.—The attorney-general of British Columbia must surrender all books and papers of Solloway, Mills and Company which have been seized and held under the Securities Frauds Prevention Act, the court of appeal ruled in final settlement of the appeal of W. J. McGee versus Hon. R. H. Pooley.

STRICT ECONOMY NEEDED FOR C.N.R. SAYS MINISTER

Ottawa, Ont.—The motto of the Canadian National Railways should be "care, caution and proper economy," Hon. R. J. Manion, Minister of Railways and Canals, informed the House of Commons. While denying the charge that the government is unfriendly to the Canadian National, the minister stressed the need for careful examination of accounts, and the exercise of economy in the management of the system.

"I say that the statement that is being foolishly made by some of the press of the leader of the opposition that we are enemies of the Canadian National, is simply an untruth," Dr. Manion warmly declared. "Any man who is an enemy of the Canadian National Railways is not a good Canadian, and therefore, as I consider this a good Canadian government, and that we are at least good Canadians, we are not the enemies of the Canadian National but its friends, desirous of looking after its best interests."

While presenting facts and figures which indicated that the financial position of the government system is such that the greatest care and economy must be practiced, Dr. Manion's statement was not without a ray of hope for the future of the railway. If the depression passes, if unwise capital expenditures are eliminated and costly changes are not carried out, and if economical management is brought into play "and if we and the people of this country are reasonable in their demands from the National Railways and from the government, I think within five years there will be a very much more hopeful and cheerful picture," the minister said.

Winnipeg Is Visited By Caterpillar Plague

Insects Devour Leaves On Whole Groves Of Trees

Winnipeg, Manitoba.—With whole groves of trees almost denuded of leaves, particularly in Kildonan Park, and Elmwood cemetery, Winnipeg is suffering a severe visitation of the caterpillar plague.

Millions of wriggling green insects, have devoured countless leaves in preparation for their pupa stage.

The public parks board attempted to wipe out the vandals with arsenic of lead, but according to George Champion, superintendent, the equipment and force available have proved insufficient to combat the hordes of tiny leaf destroyers.

Farmers Going North Are Making Mistake

Timberland Soil In Northern Saskatchewan Usually Bad

Saskatoon, Sask.—Farmers of the dried-out south country who are moving to timberland regions of the north are making a mistake. That is the opinion of Professor A. H. Joel, head of the soils department at the University of Saskatchewan.

Professor Joel, in an address before a Kiwanis club luncheon meeting here recently, said: "I don't like to see flocks of people going north. Timberland soil is bad as a rule. If, however, they settle on black grassland soil in amongst the timber they may be alright."

Escaped Injury In Plane Crash

Quesnel, B.C.—Carrying supplies to his father and companions at Thudade Lake in Liard mining district, northern British Columbia, Tom Corliss, 22, crashed with his plane and after 65 hours of hiking reached Takla Lake. His plane, equipped with pontoons, fell in the forest when the engine stalled at 4,000 feet. Both wings were stripped off.

Drop In Revenue For May

Ottawa, Ont.—Canada's revenue from customs and excise duties and excise taxes for the month of May were \$19,678,833, as compared with \$25,540,625 for the corresponding month last year. Figures were released Tuesday by the Department of National Revenue.

BRITISH SCULLER'S SPORTSMANSHIP REWARDED

In recognition of his sportsmanship, Canadian rowing enthusiasts have presented a canoe to Jack Beresford, Jr., who was eliminated in the Diamond Sculls last year when he waited until Joe Wright, Jr., had cleared a crab just after the start of one of the heats. Joe Wright won the heat, but later was defeated by the German entrant, who, in turn was defeated by Jack Guest, winner of the famed trophy. The picture shows the English sculler and two companions having a try-out on the Thames at Putney. Left to right, Jack Beresford, Ted Phelps, world's professional champion, and Bob Pearce, Australian champion now representing Canada.

BRIDGING THE CREEK

There is a rumour afloat that the
Village Council will not construct an-
other bridge of any sort across the
creek to the island. No doubt this said
rumor is mostly talk at the present
time, for we believe that nothing defi-
nite has been decided this soon after
the flood. Another matter to consider
from such a rumor is that it may have
been started by someone who misun-
derstood a remark by one of the offi-
cials, for no doubt some remarks have
been made, especially as the Village of
Carbon is so short of funds at the
present time.

But to get back to the point of this
bridge building. There will most cer-
tainly be some cost attached to any
undertaking that our Council may have
in view. The Village cannot very well
expect residents to stay on property
that has no exit and expect these per-
sons to pay taxes. On the other hand,
the Village cannot "drop" the island
from its townsites without cutting off
a great deal of other taxable property.
In other words the Village of Carbon
will have to make the best of a bad
deal, and that will mean the putting
in of some structure for crossing the
creek, no matter how little is spent.
There is plenty of time within the next
month to think this matter over. Cer-
tainly, another swing bridge does not
seem to be the proper course of action
when the cost is close to \$6000; es-
pecially when the old traffic bridge is
still sound and anchored on the island.
The first thing to do regarding this
bridge would be to get permission from
the Provincial government to use this
old structure. Then when the Govern-
ment bridge crew is out putting in the
traffic bridge to the C.P.R. depot an
arrangement could be made whereby
this crew could get everything in shape
to put this old bridge back again. The
cost may be a little more, but no doubt
this work could be put under the un-
employment relief whereby the Gov-
ernment would pay part of the cost.
This is a matter well worth consid-
ering. We believe that the present Vil-
lage Council is far sighted enough to
see that they cannot drop the island
and this being the case some structure
must be put in for crossing.

HOME PAPER AND MERCHANT

(The Vulcan Advocate)

More and more the town merchant
is appreciating the art of writing ad-
vertising copy. He studies his public
and his goods, and injects into his
advertising space, some snappy touch,
some striking bargain that will bring
customers and his goods together. He
realizes that it is not sufficient to car-
ry good goods. He must keep the pub-
lic informed of this and he must in-
form them in a way that impresses
them.

Our local merchants are giving no
small time to the construction of their
advertising appeal, knowing that the
space which they reserve in their home
town paper, must contain an idea that
"registers." It must draw trade.

Sporadic advertisements now and
then have not the pulling power of the
regular weekly ad. Many a merchant
plans in his advertising for weeks
ahead, playing up one line of goods
one week, another the next week, ac-
cording to the season. He follows a
campaign system and checks his re-
sults. He has at least come to realize
the value of consistent regular appeal.

Miccadoo
Says ---

Married women, who have gone care-
fully through their husband's pockets,
affirm that there is very little change
in men's suits this season.

The girl who is too independent gen-
erally has to paddle her own canoe.

WHOSE FOOT ARE YOU

World's Grain
Exhibition
and ConferenceFarmers Will Win
\$210,750⁰⁰ in Prizes

The World's Grain Exhibition and Conference offers Canadian farmers
an opportunity to share in cash prizes amounting to \$210,750.00.
Comprised in 56 competitive classes, open to the whole world, are
1,701 cash prizes. A few of the major awards follow:

\$2,500 a first prize for 50 pounds of wheat, 30
pounds of oats,
\$1,500 for 40 pounds of barley, 50 pounds of rye,
\$ 800 for 10 ears of corn,
\$ 300 for 30 pounds of peas, 30 pounds of flax,
20 pounds of clover.

With this splendid opportunity before them, Canadian farmers should
keep a watchful eye on their growing crops. They should mark for
special care those areas that appear most promising.

It should be understood that all seed and grain samples, if they are
not already selected, will have to be found in crops of this year.
All exhibits must be received by the Exhibition authorities on or
before March 1, 1932.

Of vital importance to the advancement of Canadian agriculture will
be the winning of World Championships in 1932 by farmers of Canada.
Their seed and grain exhibits must demonstrate to the world the quality
of Canada's field crops.

Select the classes from the prize list most suited to the crop you grow;
then select your samples from the best you have.

It is best to make your entry NOW.

Your sample for exhibit must be in the hands of the Secretary at Regina
on or before March 1, 1932.

Valuable information relating to the preparation of grain and seed for
exhibit may be secured by writing to the Secretary of the Provincial
Committee, World's Grain Exhibition and Conference, care Department
of Agriculture, your own province.

Show what you grow and share what you know

On application, the Secretary, World's Grain Exhibition and Conference, Imperial Bank
Chambers, Regina, will send you prize lists, rules and regulations governing competitive
entries and all other information.

CHAPTER XX.—Continued.

Angela's hand, resting on her steamer chair not far from Nick's, caught his suddenly in a frightened clasp. He turned toward her, startled, but she had already drawn it away, and was looking out to sea.

"Any of you been there?" persisted the Colonel cheerfully.

Nobody had.

"It's just a long neck of land stretching out into the sea," he went on affably. "Rocks, and berry bushes, and one wide, wonderful curving beach—at least, that's what it was before the summer people took it up. It's some colony now. Finest hotel in the state out on the point beyond the artists' studios. Never hear your name, Mrs. Halliday, without remembering something rather ghastly that happened there a year or two ago—the only summer I've missed being there in a long time. Some people named Halliday took a house there for the summer. Any relatives of yours?"

"No," said Angela, her voice queerly breathless. "No; I never heard of the place."

"Quite a yarn," went on the Colonel. "These Hallidays (just a man and wife, I believe), were evidently a queerly assorted pair. He was a quiet chap—professional man of some kind, and—crazy about his wife. Never looked at anybody else. She was different. Wasn't happy without a man at her heels. Before the summer was over some called her a murderess, but—"

"It's getting awfully chilly," broke in Angela. "I think I'll go for a wrap."

She would have risen, but Amy Myers tossed a sweater into her lap.

"Take that. I'm melted; the air's so breathless. Do go on, Colonel Nowell; this bids fair to be exciting."

The Colonel obeyed eagerly.

"They hired the Burgess place, a fine big house out by the cliffs. The cottage next to it was taken by a man named Ashley—an artist from somewhere in New York state. He had a wife and baby. Everyone liked them; nice, homey sort of people, I understand, though Ashley himself was—well—his views were a trifle too radical to suit some of the regular population of the Neck; though I doubt if they thought much about it till after the tragedy."

The Colonel leisurely lighted a cigar, enjoying the sense of keeping his audience in suspense. Angela stirred again, as if she would arise, then sank back in resignation as he continued, her hands tensely clutching the arms of her steamer chair.

"Well, this Mrs. Halliday was a sort

of vampire. She tried her charms on the Rector of St. Anne's, but they didn't work, so she began on Ashley, and before she was through she finished him—literally. The servants said afterward that they heard her husband remonstrating; but she had a high temper, and I guess he couldn't do anything with her. Anyhow, Ashley went off in a gasoline launch with her one day, and didn't get back till morning. When he landed and went to his own cottage (probably scared blue, too, trying to think what he'd say to wifey), he well, he found that he didn't have to say anything. She'd taken carboic acid an hour before."

"How horrible!" exclaimed Nick, wholly unconscious of the rigidity of the form beside him.

"But that's not all." The Colonel was plainly relishing the effect of his lurid tale. "Mrs. Ashley was in the bathroom, alone, or so the neighbors gathered, when the baby woke and yelled so long that someone went in to investigate. Ashley had evidently turned her over to see if she were gone; and then he'd reached for his razor and slashed his throat."

Angela had risen. Even in the moonlight her face looked pallid.

"That's not a pretty story, Colonel Nowell," she said unsteadily. "It's given me the creeps." She laughed a forced little laugh that rang out eerily on the still night. "Well, I think I'll turn in now. 'Night, everybody. Hope there's some air to breathe tomorrow."

She moved toward the door, staggering, though the sea was like a mill pond. Nick sprang to her side, putting an arm about her until she reached the stairs.

"All right?" he questioned. "That was a beastly yarn to spin a night like this. Sure you're all right?"

But Angela did not speak as she fumbled blindly for the bannister.

When he came back the Myers were preparing to go below; but Colonel Nowell was at the rail, and motioned Nick to join him.

"Hope my story didn't upset the little lady too much. Say! I wonder if those Hallidays weren't some relation after all! Uncommon name—Halliday; but she said she'd never heard of Painter's Neck."

"I think it was just Mrs. Halliday's extreme sensitiveness," Nick answered. "She seemed nervous, I noticed, when you began to talk. What became of those people, Colonel Nowell?"

The Colonel shrugged. Nick had noted this growing habit, and wondered if the little man had caught it from Angela.

"You mean the Hallidays? They left the Neck at once—naturally. She was in a sanitarium for a time—used up nervously. Gad! do you wonder? They never went back to the Neck, and that's all I know, though, come to think of it, someone told me last summer that Halliday had provided for the child—the Ashley child. Look! there's a big cloud gathering. Wonder if our good weather's over."

In their cabin below, the Myers had undressed in silence. It was as Amy dutifully stooped for his good-night kiss, that he said, jerking a thumb in the direction of Angela's stateroom: "Well what do you make of that?"

His wife smiled.

"I think our friend isn't always a successful actress; but let's not talk about it here. These partitions are too thin. Good-night."

And behind that thin partition lay Angela, hot hands pressed against her eyes as if to shut out some horrid picture.

She was thinking: "They said the carboic had spilled onto her face. . . . She was burned horribly. . . . What else could the man do then? . . . She was a fool anyway. . . . Why didn't she give him time to explain? . . . I didn't hurt him! . . . My God! . . . won't they ever let me forget?"

As she turned dry-eyed to the wall she was conscious of an inexplicable longing—an aching want for the steady touch of her husband's hand.

CHAPTER XXI.

Two hours later the moon was ob-

scured by clouds, and the face of the deep seemed vaguely restless. After the Colonel left him, Nick sat for a long time on deck, enchanted with the night—the soft and fragrant breeze—the thought that it was he, Nicholas Hastings of Bakersville, U.S.A., who had seen the wonder and beauty of these tropic isles. Wooded, coral-tipped bits of fairyland, they seemed to him. All his life he would be grateful for these weeks, and grateful to Angela, who had made them possible.

He frowned as his thoughts turned to Angela. She was undoubtedly upset by the Colonel's story—curiously upset. Putting two and two together one might think—Still, it was a horrid thought. He hoped none of the others had grasped it. Of course Colonel Nowell had never met James Halliday. He couldn't know how near the story fitted. And Angela did enjoy having a man at her heels! Nick smiled into the clouds. Why, she even enjoyed an old married man like himself! It was perfectly evident, and with Mrs. Myers. Perhaps she was one of those women who didn't care for her own sex. That might account for Gay's strange aversion to her.

Gay! Why, it was a relief just to think about her! No wonder she and Angela didn't hit it off. They were so—different. Gay could talk to the men—could keep them interested (hadn't he seen Halliday himself looking at her as if he thought her a little piece of all-right?), but she didn't look at them the way Angela did. Gad! he was glad she didn't. Not that Angela meant anything by it either. They were just—well—different, that was all.

He arose, walking a bit restlessly up and down; glancing at the clouds that were hiding the familiar stars; wondering why Angela had grasped his hand so suddenly at the mention of Painter's Neck. Yet she said that she had never heard of the place.

"I'd give a penny to know," he mused quietly; then broke off with an impatient: "No I wouldn't either! Thunder! where are my thoughts taking me? Why, if it were Angela, if she'd been even the indirect cause of that ghastly happening, she wouldn't look at another man as long as she lived! No decent woman would. It must have been nerves, and—and sympathy, that upset her so. Gee! I hope the others didn't notice. The Colonel caught on all right, but he's a gentleman. He'll keep his mouth shut."

(To Be Continued.)

Women and Asthma. Women are numbered among the sufferers from asthma by the countless thousands. In every climate they will be found, helpless in the grip of this relentless disease unless they have availed themselves of the proper remedy. Dr. J. D. Kellogg's Asthma Remedy has brought new hope and life to many such. Testimonials, sent entirely without solicitation, show the enormous benefit it has wrought among women everywhere.

Stained Glass Windows In Battleship Chapel

Dedication Ceremony Performed On Cruiser "Republie" Was Unique

The unique ceremony of dedicating a stained glass window on board a battleship was performed at Sheerness by the chaplain of the fleet, Archdeacon Walter K. Knight-Adkin, on the battle cruiser "Republie." "Republie" is the first ship in the Royal Navy to have her chapel adorned in this way, and the window fits into an ordinary porthole in the ship. Before the ceremony the chaplain addressed the officers and men on the quarter-deck. The designer is Archibald Nicholson. The window represents St. Nicholas blessing two sailors.

It is better to have little knowledge with humility and small understanding than greater treasures of learning with a vain self-conceit.

Ministers who preach sermons on economy must expect to get buttons in the collection.

Eating When Tired Bad For Digestion

Body Needs Chance To Recuperate and Rest Is Better Than Food

When you are tired don't eat. Rest in times of fatigue, will do more for the digestion than something thrown into the stomach, says Hygeia, the health journal.

Many people develop a habit of eating or drinking to relieve fatigue or merely to pass away the time. When a person is tired the body needs a chance to recuperate. It is not then advisable to take in quantities of food or to overstimulate the body with drinks and drugs.

Human beings need food to develop energy for daily work. The antidote to desire for food is the feeling of satisfaction. To go on eating merely because food is set before one, after satisfaction has been reached, is to overtax the system. Because people are more moderate now in their eatings and drinkings they are living longer than their forefathers who gorged themselves on food in the belief that the more they ate the stronger they would become, and who boasted of being "three-bottle men."—Regina Daily Star.

Aviators Have Narrow Escape

Almost Sucked Into Crater Of Volcano In Alaska

Man, for the first time, has flown over the crater of Aniakchak volcano on the south shore of Alaska Peninsula, but the suction of cold air towards the hot crater, 21 miles in circumference, pulled the aeroplane toward the pit, and only a sudden dive away from the gaseous mouth saved the ship from lunging into the hole.

A plane, piloted by Harry Blunt, with Al Monsen, mechanic, and carrying Father Bernard J. Hubbard, the "Glacier priest," after several days' waiting for good weather, soared over the world's largest active crater taking off from Chignik Bay.

Sailing over some crags, several huge eagles attacked the plane. Father Hubbard reported, sneaking from behind on a short turn and diving in. The propeller wash turned them over like chips of the ocean, but, screaming, they came back for more until out-distanced.

THE RHYMING OPTIMIST

By Aline Michaelis

PRAYER FOR THE JOURNEY

Oh, God of small things as of great,
Of atom as of star,
Let me not fear or hesitate
Before the things that are!
Let me unflinchingly go
Always with steadfast trust,
Since I am blest in that I know
The plan is wholly just.

Oh, God of worlds unguessed, remote,
And farthest deeps of space,
Yet not too vast a force to note
The spider's silver lace,
And heed the tiny sparrow's fall,
Let me serenely tread
Life's way, and go content in all
The paths where I am led.

Oh, God of small things as of great,
Of atom as of sun,
Let me not doubt or hesitate
Till all my course is run.

Unless worms be expelled from the system, no child can be healthy. Mother Graves' Worm Exterminator is an excellent medicine to destroy worms.

Long-Lived Twins

Retired Farmers Just Celebrated Their Ninety-First Birthday

Theresa Agnes Golding and Miss Clara Golding, whose deaths at the age of 88, within a few days of each other at Rochester, were announced recently, were reputed to be the oldest twins in England.

A Lincoln resident has stated that at Haxey, recently, two retired farmers, John and William Cooper, celebrated their ninety-first birthday. They are known as the "Haxey twins."

Turner Valley Oil

Deliveries of Turner Valley naphtha and crude during May totalled 118,314 barrels, as compared with 114,217 barrels in April. Sales to farmers at the wells have been continuing in fairly large volume, so that the deliveries do not represent the total production. Farmers purchase around 500 barrels daily from the various companies.

LOSE YOUR FAT

This sensible way

Start taking Kruschen Salts—that's the common-sense way to reduce—but don't take them with the idea that they possess reducing qualities in themselves.

This is what they do—they clean out the impurities in your blood by keeping the bowels, kidneys and liver in splendid working shape and fill you with a vigor and tireless energy you'd almost forgotten had existed—you get the needed exercise.

As a result instead of planting yourself in an easy chair every free moment and letting flabby fat accumulate you feel an urge for activity that keeps you moving around doing the things you've always wanted to do and needed to do to keep you in good condition.

Kruschen Salts are the up-to-date Fountain of Youth. Take one-half teaspoon in a glass of hot water to-morrow morning and every morning—be careful of the foods you eat—take regular moderate exercise—then watch the pounds slide off.

Little Helps For This Week

"For we have great joy and consolation in Thy love."—Philemon 1. 7.

Thou in adversity canst be a sun; Thou art a healing balm, a sheltering tower;

The peace, the truth, the life, the love of One,

Nor wound, nor grief, nor storm can overpower;

Gifts of a king, gifts frequent and yet free!

There's none like Thee, O Lord, none, more like Thee.

—Maria J. Jewsbury.

There is no father, no brother so pitiful and compassionate as He who calls you His child. Whatever else may fail, be sure that His everlasting love will not fail. He is with you in your struggle against sins, in your search for truth, your woes and griefs, and loneliness, and trials. All your hope, all your patience, all your regard for what is excellent and imperishable, come from Him. And as He has given you your capacity for His friendship and His likeness, He will train you and guide you to Himself if you are submissive and obedient.—Horatio N. Powers.

Wise and experienced mothers know when their children are troubled with worms and lose no time in applying Miller's Worm Powders, a most effective vermifuge. It is absolute in clearing the system of worms and restoring those healthy conditions without which there can be no comfort for the child, or hope of robust growth. It is a most trustworthy worm exterminator.

Telephones Per Square Mile

Britain Comes Fourth, But Tenth When Population Is Considered

It was recently suggested by the "Telegraph and Telephone Journal" that a very fair test of telephone development in a country is the number of 'phones to the square mile. Taking this test, Great Britain comes fourth on the list, with 21.2 telephones per square mile. But there is very little in it. Holland, which heads the list has 22.8 telephones per square mile; Belgium, 22; and Denmark, 21. The United States is ninth on the list with 6.6 'phones to the square mile. Both Canada and Australia have fewer telephones than they possess square miles of territory. However when it comes to a test of population, Great Britain only comes tenth on the list.

The editor of the Sault Daily Star who produces those wolf stories is out campaigning for longer berths on Pullman cars—more bunk, as it were.

CORNS LIFT OFF

Pain Stops!

An amazing remedy—acts in a few seconds and causes no pain. The corn shrivels up and loosens. Another application or two and the corn drops out. Wonderful—yes it is—but that is just how Putnam's Corn Extractor works. You can buy Putnam's Corn Extractor from any druggist for 35c.

PUTNAM'S

the 5 per cent discount.

Mrs. True Olive spent the week-end
visiting in Carbon.

Since the recent rains the crops in
the Carbon district have greatly im-
proved and the yield should be much
better than was first expected. The
later sown crops are coming up more
even and with a little warm weather
should make rapid growth. Pastures
are beginning to look green again and
there should be plenty of grass in a
month or so.

Const. J. Jones, who is stationed at
East Coulee, was a Carbon visitor on
Sunday.

Miss Belle Smith was a Calgary vi-
sitor on Tuesday.

All the sloughs in the country are
full of water again, after being dry for
a number of years, and with a little
moisture during the summer it is ex-
pected that these sloughs will not dry
up. If they don't, there ought to be
some duck shooting in the district this
fall.

IN MEMORIAM

In loving memory of my Dear Husband
WALTER BRANLEY
who passed away on June 22, 1928

"In the lonely hours of thinking,
Thoughts of you are ever near;
We who loved you, sadly miss you,
As it dawns another year."

The Trochu golfers, who were to
visit Carbon on Sunday, did not come
on account of the condition of the road.
Had they arrived, there would have
been some exciting rounds as the local
golf links has some fine water hazards
since the flood. On the eighth hole there
is a hundred and eighty yard carry to
clear the water.

Toronto's mayor recently advised the
city business men and firms to give
no printing jobs to printers outside of
Toronto. When a Toronto printing firm
asks you for a job be as loyal to your
home town as Toronto's mayor. This
also applies to Calgary printers.

The regular monthly meeting of the
Municipal District of Carbon was held
here on Tuesday, June 23rd.

E. J. Ohihauser and family returned
Monday from a month's motor trip to
United States points.

A number of local men are being
employed by the C.P.R. to work with
the bridge gang.
